EDUCATION

The Ohio State University

Columbus, OH

B.S. in Computer Science, Minor in Statistics.

2025

- Coursework: **Bayesian Statistics, Artificial Intelligence, Computer Vision**

EXPERIENCE

Palo Alto Networks

October 2025 – Present

Software Engineer

Santa Clara, CA

- Architected and launched a Certificate Management Service in **Go** to automate lifecycles for 50k+ certificates, collaborating with external CyberArk teams to integrate legacy services within a 10-week acquisition timeline.
- Engineered a Renewal Engine using **GC Pub/Sub** and **MySQL**, ensuring 100% certificate renewal uptime for 1000+ customers.
- Developed an Agentic RCA Playbook using **Jira MCP** and **Gcloud CLI** to investigate HAR files in tandem with backend telemetry; automated the discovery of root causes and reduced production MTTR by 87% (4h to 30min)
- Owned the Strata Logging Service UI, managing feature delivery and legacy code (**React, Node.js**) revamps for 30k+ enterprise customers.

Intuit

May 2025 - August 2025

Software Engineering Intern

Mountain View, CA

- Implemented a multi-channel MCP in Cursor to support issue triaging, reducing debugging time by 20%.
- Built sophisticated MCP Servers for Slack and Github, for company-wide usage, resulting in 70+ users.
- Migrated 2 plug-ins to TypeScript, eliminating legacy patterns and reducing production bug frequency by 30%.

Lawrence Berkeley National Laboratory

May 2024 – August 2024

Software Engineering Intern

Remote

- Spearheaded a team of two interns to find 2 buffer overflow vulnerabilities within the **HDF5(C)** library.
- Applied **Docker** to automate and containerize testing scripts in **Linux**, speeding up library assessment by 20%.
- Employed **LLVM** to discover buffer overflow errors within modules, contributing to a 5% improvement in security.

NSF AI Institute

June 2023 – August 2023

Machine Learning Research Intern

Columbus, OH

- Led a team of three research interns to assess the effectiveness of large language models on application security.
- Developed a **Python** script leveraging the **GPT-3.5 API** to generate and test 100+ functional fuzzing corpora.
- Presented a software demo as well as research findings to a group of 5 professors and 20 postgrad students.

PROJECTS

Buckeye Vertical | *C++, Python, ROS, YOLO, Bash, SLURM*

Sep. 2023 – Present

- Managed a team of 10 on the training and deployment of a vision model, winning 4th at the **SUAS** competition.
- Generated domain randomized synthetic data in **Unity(C#)** and real data resulting in 20k+ image datasets.
- Adopted **YOLO, OpenCV, & OCR** to develop cutting-edge object detection model, improving inference by 33%
- Used **Bash** to create scripts and automate model training on supercomputer clusters, reducing train time by 50%.

Playground - Game Rec Service | *React, Flask, Postgres, Redis, Elasticsearch*

January 2025 – May 2025

- Championed a team of four to create a game recommender, boosting user purchases by 50% each year.
- Designed a scalable service using **Flask** and **Elasticsearch** to efficiently index games for a recommender model.
- Developed an auth system utilizing **JWT** and **Redis**, allowing for seamless login and retrieval of user game data.
- Implemented Collaborative Recommender algorithm with Kaggle datasets, improving accuracy of recs by 35%.

TECHNICAL SKILLS

Languages: Golang, Python, JavaScript, TypeScript, C, C#, Java, Bash

Frameworks: React, Node.js, Next.js, Flask, JUnit, Unity

Developer Tools: Git, Docker, Kubernetes, AWS, Google Cloud Platform, Jupyter, Claude Code
